

INCOM NEWSLETTER 11; FRIDAY FEBRUARY 8TH 2019

INCOM TEST LAB

The INCOM test network to be built at DTU has received the first delivery, which is a donation from DeIC, the Research and Education network in Denmark. The Donation is the former national 10 GBit/s network, which is equivalent to the core network from an INCOM point of view. Many pallets to be unpacked and installed in the coming period!

Any partners having further ideas or input to other parts of the INCOM network should now contact Michael Berger from DTU or the INCOM PMO.

SAVE THE DAY - INTERNAL SPRING EVENT

In order to facilitate networking among the INCOM partner staff we will arrange a full day event May 23rd at DTU. The agenda will comprise presentations from the tasks on their plans and premature results from the work. We hope that we also will be able to have presentations from an end-user and from a market perspective.

SAVE THE PROSPECTIVE DAYS - INCOM AUTUMN CONFERENCE

INCOM will also arrange a one-day conference October 10, 11 or 25 2019, so please save these prospective dates. The audience will be more externally oriented and will on top of the INCOM partners also embrace the INCOM associated partners, Advisory Board and other INCOM stakeholders. The topic is the INCOM domain and the first INCOM results should have a prominent presence – so please prepare for that 😊

ROADTRIP | MEETING WITH THE PROJECT HEAD

These weeks the PMO is arranging meetings between all the partners and the INCOM project head. The purpose is to exchange experience face to face from the first months of work.

FINANCE REPORTING

Thank you for the monthly financial reporting. We are happy to notice the contributions from you, and the first aggregated results also shows that a close monitoring of the finances are relevant and a good indicator of the activity level.
